

# Agenda

## syngo Dynamics Report Design - Essentials

### OBJECTIVES

This three day course combines theory and hands-on experience to provide a complete overview of the syngo Dynamics reporting functionality and the use of the Report Designer to create customised structured reports.

It is aimed at the syngo Dynamics Administrators and key users who are responsible for the hands-on customisation of the syngo Dynamics report templates, and as such, would be familiar with the clinical reporting needs relevant to their departments for application within the syngo Dynamics system.

### AGENDA
