Batteries
The batteries shall always be sufficiently charged.

Caution
Weak batteries of wireless footswitch
Discontinuation of interventional treatment
- Make sure that the batteries are charged before starting an examination.
- In case of empty battery, use the provided power adapter to continue treatment.

The batteries of the wireless footswitch must be exchanged once a year by authorized and trained staff. Please call Siemens Service. Unauthorized exchange may cause severe damage.
Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

2.4 Cleaning and disinfection

Caution
Use of harsh cleaning agents, liquids or sprays.
Risk of electrical hazard or damage to the system
- Use only substances for cleaning and disinfection, which are recommended.
- Do not let cleaning liquids seep into the openings of the system, e.g. air openings, gaps between covers.
- Observe the following cleaning and disinfection instructions.

2.4.1 Cleaning agents for all LCD displays, Large Display and Artis Cockpit only
The following active ingredient classes can be used for LCD displays:

<table>
<thead>
<tr>
<th>Active ingredient class</th>
<th>Tested cleaning agents and disinfectants</th>
<th>Additional examples</th>
</tr>
</thead>
<tbody>
<tr>
<td>Alcohol</td>
<td>Ethyl alcohol 96%</td>
<td>Hospiset cloth</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Microcide liquid</td>
</tr>
<tr>
<td>Aldehyde</td>
<td>Melsitt</td>
<td>Aldasan 2000</td>
</tr>
<tr>

2.4.2 Special instructions for all LCD displays, Large Display, and for Artis Cockpit only

- LCD displays are very sensitive to mechanical damage.
  - Avoid scratches, bumps, etc.
- LCD displays are very sensitive to liquids.
  - Longer contact with the liquids can cause discoloration or can leave calcium residue on the surface.
  - Droplets that run down between the panel and the frame can cause damage or total failure of the panel!

1. If possible, immediately clean any droplets of liquid.
2. If a cleaning agent is sprayed directly on the display surface, make sure that any droplets that run down are wiped off with a microfiber cloth before they reach the edge of the panel.
3. If the front of the panel is soiled, clean it with a microfiber cloth and, if necessary, with a glass cleaning agent. Clean housing parts with a cleaning agent for plastics only.

2.4.3 Cleaning agents for all other system parts

- Some substances contained in disinfectants are known to be hazardous to health. Their concentration in the air must not exceed the legally defined limit.
- Always follow the manufacturer’s instructions when using the disinfectants.
The following active ingredient classes can be used:

<table>
<thead>
<tr>
<th>Active ingredient class</th>
<th>Cleaning agents and disinfectants</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aldehyde</td>
<td>Incidin Perfekt</td>
</tr>
<tr>
<td>Alkylamine</td>
<td>Lysoformin Plus</td>
</tr>
<tr>
<td>Chlorine derivates</td>
<td>Clorina</td>
</tr>
<tr>
<td>Commercially available dishwashing liquid</td>
<td>Tempo, Fairy Ultra, Palmolive</td>
</tr>
<tr>
<td>Guanidine derivates</td>
<td>Biguacid S</td>
</tr>
<tr>
<td>Organic acids</td>
<td>Apesin SDR san</td>
</tr>
<tr>
<td>Quaternary compounds</td>
<td>Oasis Pro</td>
</tr>
<tr>
<td>Peroxides</td>
<td>Sanosil</td>
</tr>
<tr>
<td>Pyridine derivates</td>
<td>Bacoban WB</td>
</tr>
</tbody>
</table>

The following products should **not** be used:
- All alcohol-based products
- All chlorine-releasing products
- Benzine / phenole-based products
- Products: Banicide Advanced, Wavicide, Terralin, Cidex OPA

### 2.4.4 Instructions for cleaning and disinfection

- **Sprays can penetrate the interior of equipment.**
  It can cause damage to electronic components and the formation of flammable mixtures of air/solution vapor.
- **Use gloves to avoid infection.**

1. Before cleaning the system, block radiation and block unit movements.
   (+ Page 228 Blocking radiation)
   (+ Page 229 Blocking unit movements)
2. Use a lukewarm detergent solution and a soft cloth to remove slight contamination.
3. Clean all contaminated parts and all parts which may or have come into contact with the patient.
4. Remove contrast medium spots best of all with warm water.
5. Remove major contamination first with a cloth soaked in alcohol, then wipe off with clear water.
6. After using disinfectants, always wipe off with clear water.
7. Remove any contamination of Velcro tapes using a plastic comb.
8. Keep the ventilation slots of all components unobstructed.
9. Regularly clean the dust off all rails and joints etc.

2.4.5 Sterilization

Please observe your hospital’s regulations concerning sterilization.

2.5 Information about unit movements

Because of the possible speed of movement of the stand and C-arm and the tabletop, this system must be operated with particular care.

2.5.1 Collision protection

For reasons of safety the systems are equipped with collision sensors.

(→ Page 138 Safety equipment)

If one of the collision sensors is activated, further unit movements are blocked and a message indicating that appears.

2.5.2 Dead man’s grip

All unit movements are controlled with a dead man’s grip (DMG), that is, movements are performed only while the operating element is being actuated. In the event of danger, the movement can be stopped immediately by releasing the dead man’s grip.

2.5.3 Danger of crushing

The patient and operating personnel must grip only the handles which are intended for the proper handling of the equipment or positioning of the patient. When it is not possible, attention must be paid to possible risks of injury by crushing in the vicinity of moving parts.

- Pay special attention to the risks of crushing fingers/hands between moving parts and their guide openings.
- Before performing unit movements make certain that the patients do not grasp the frame of the tabletop.

2.5.4 Abnormal movements

If any part of the system moves although that movement was not released, for example, if the display ceiling suspension moves downward by itself, there might be a fault.

- Shut down your system and call Siemens Service.
This product is provided with a CE marking in accordance with the regulations stated in Appendix II of the Directive 93/42/EEC of June 14th, 1993 concerning medical devices. In accordance with Appendix IX of the Directive 93/42/EEC, this device is assigned to class II b.

The CE marking applies only to medical devices which have been put on the market according to the above-mentioned EC Directive.

Unauthorized changes to this product invalidate this declaration.

Whenever the hardware necessary to run the software is supplied, the CE Mark is provided in accordance with, if applicable, Electro Magnetic Compatibility Directive 2004/108/EC and / or Low-Voltage Directive 2006/95/EC.

Caution: Federal law restricts this device to sale by or on the order of a physician (21 CFR 801.109(b)(1)).
