teamplay Dose – Simplify your radiation dose management

Monitor quantities, simplify your reporting, and accelerate your processes

Main challenge
Following nationally defined reference levels for applied radiation is mandatory. How does your radiology department prove its compliance?

As a healthcare professional you are obligated to keep exposure to ionizing radiation as low as is reasonably achievable (ALARA principle). How do you monitor this?

Our solution for dose monitoring

teamplay Dose is an enterprise-wide radiation dose management solution providing you with easy access to dose data, supporting the quality assurance process for monitoring imaging radiation dosage.

teamplay Dose displays data for continuous dose performance evaluation, no matter which modality or vendor is used.

Perform efficient dose data analysis and get an overview of the scan protocols used by type and target region. Monitor the applied radiation over time by displaying the accumulated dose for each individual patient. And compare your outcomes among peers using global benchmarking with teamplay Dose.

What does teamplay Dose do for you?

- **Analysis:** Patient-centric dose monitoring, including information from multiple sources, image headers, DICOM Radiation Dose Structured Report (RDSR), and optical character recognition (OCR) on dose report images
- **In-depth insights:** Size-specific dose estimate (SSDE) and effective dose calculation using smart algorithms
- **Comparison:** Benchmark against peers and national and institutional reference levels
- **Report:** Reporting on dose events and storage for future quality assurance

Customer voice:
“teamplay helped us to reduce the average dose, received by the patients, by about 10–15% over the last three months.”

Dr. Nikolaos Papadakis
Medical Physicist, IATROPOLIS Athens, Greece

Our teamplay performance management applications

- **teamplay Usage – Increase your efficiency and optimize your imaging fleet utilization**
  Analyze your imaging fleet utilization and understand how you can increase your productivity.

- **teamplay Protocols – Speed up your protocol management by facilitating remote access**
  Identify best-practice scan protocols for your imaging fleet and optimize your radiology workflow with teamplay Protocols.

- **teamplay Images – Share and discuss images in a secured environment**
  Access and share imaging studies with peers to discuss relevant cases in a secured environment.

- **teamplay Insights – Maximize your insights, optimize your value**
  Create interactive data visualization boards to tackle sophisticated challenges in the operations of your radiology department.
