Mobile MRI – A flexible solution

Mobile MRI means the newest, most innovative technology in Magnetic Resonance delivered right to your doorstep in one complete package. A complete MRI solution in a mobile environment can address individual business needs and clinical requirements. Whether to meet growing capacity demands for MR scanning in your hospital or facility or to provide a temporary solution while your current MR system is being upgraded or replaced, Mobile MR solutions from Siemens will provide the answer. You need access to the latest technology but have insufficient demand or budget to support your own system? Then Mobile MRI solutions from Siemens can help you build shared ownership models with your partners, providing access while reducing the cost. Or you may be a service provider, operating a single unit or fleet of mobile units delivering Mobile MRI solutions to your customers. You may need to add more capacity or upgrade your technology to provide more services. Whatever your business need, Siemens offers the leading solutions in Mobile MRI.

Creating the future of MRI

Healthcare is changing at an almost incalculable rate. The demands of patients are altering expectations while the demands of business require new responses. It’s an exciting time filled with great opportunity. That’s how we see it at Siemens MRI. Which is why we relentlessly drive innovation and transformation.

Our focus is on helping our customers deliver superb care, more efficiently than ever. We measure ourselves by our ability to have a leading solution for each business need. This philosophy is extended to innovative Mobile MRI solutions.
Leading technology

You have the choice between four Siemens solutions at 1.5T to meet your business need. MAGNETOM Avanto, delivering MRI excellence in 1.5T and incorporating the revolutionary Tim™ (Total imaging matrix) technology. MAGNETOM Espree, the first Open-Bore MRI System, which combines a 70 cm open bore with the world-wide shortest system length of 125 cm and Tim. MAGNETOM Symphony with a top performance at a great value. Or MAGNETOM ESSENZA, which was developed from the ground up to be an affordable, reliable powerhouse that will support both your clinical and financial success.

Workflow efficiency

No matter which MAGNETOM scanner you prefer, syngo, Siemens’ easy-to-use software platform, provides a highly ergonomic user interface which allows you to know intuitively what to do. Intelligent automation features accelerate exams and enable smooth and efficient workflow even across modalities and departments.

Future security

And with the syngo EVOLVE Package – a unique offering to regularly participate in technological advances – you remain constantly up-to-date with upgrades to the latest syngo software and hardware platforms. syngo software support and two upgrades of the whole computer system within 6 years round out a most comprehensive obsolescence protection.
