

Fast Track Diagnostics assays are manufactured by Fast Track Diagnostics Luxembourg SARL and distributed by Siemens Healthcare Diagnostics Inc. For Fast Track Diagnostics assays, please see compatibility list. Siemens IVD assays are compatible with the VERSANT kPCR Molecular System only.

VERSANT is a registered trademark of Siemens Healthcare Diagnostics Inc. kPCR PLX assays are manufactured by Altona Diagnostics and distributed by Siemens Healthcare Diagnostics Inc.

CE-marked for IVD use in the EU. For research use only (RUO) in the U.S.

Product availability will vary country to country and is subject to varying regulatory requirements. Please contact your local representative for availability.

Fast Track Diagnostics

Siemens Healthineers, with the acquisition of Fast Track Diagnostics Ltd., offers one of the largest ranges of syndromically grouped real-time PCR multiplex assays available—covering major disease groups like respiratory infections, gastroenteritis, hepatitis, infections of the immunosuppressed, sexually transmitted infections, fevers and rash, meningitis, infections of the immunosuppressed, and tropical fever.

More Targets, Better Results

Syndromic Real-time PCR Multiplexing Assays

Expand—and consolidate— your syndromic testing.

Challenge: Consolidating viral, bacterial, fungal, and parasite testing

Infectious diseases are caused by pathogenic microorganisms, such as bacteria, viruses, parasites or fungi; the diseases can be spread, directly or indirectly, from one person to another.¹ As of 2016, infectious diseases account for about 1 in 4 deaths worldwide, including approximately two-thirds of all deaths among children younger than age 5.²

Early diagnosis and monitoring of these infections is extremely important in the management of high-risk patients. Molecular laboratories are increasingly asked to do more with less in the face of laboratory staffing challenges, managing multiple assays on multiple platforms, and service agreements with multiple vendors. The challenge is compounded by the need for high-quality nucleic acids from a wide variety of specimens across several disease states.

Solution: Fast Track Diagnostics Syndromic Real-time PCR Multiplexing Assays

Siemens Healthcare Diagnostics offers one of the largest ranges of syndromically grouped real-time PCR multiplex assays covering the major disease groups such as respiratory infections, gastroenteritis, sexually transmitted infections, childhood infections, meningitis, eye infections, immunosuppression, hepatitis, and tropical fever.

Syndromic Testing

- Real-time PCR multiplex testing for infectious disease detection based on the syndromic approach
- Comprehensive diagnostic approach to a clinical syndrome
- Faster, better informed decisions while realizing time and cost efficiencies for clinicians

Lower Costs and Greater Efficiency

- Syndromically grouped real-time PCR multiplex kits
- Time, resources, reagents, and budget savings
- Single sample and test covers probable pathogenic causes—virus, bacteria, fungi or parasite—at the same time, in one run

Better Outcomes

- Clinically-relevant testing for viral, bacterial, and other types of infections
- Improved patient outcomes with a faster clinical diagnosis³
- Covers major disease groups: respiratory infections, gastroenteritis, sexually transmitted infections, fevers and rash, meningitis, eye infections, immunosuppression, hepatitis, and tropical fever

One-step syndromic real-time PCR multiplexing kits for the simultaneous detection of viruses, bacteria, fungi, or parasites.

Syndromically Grouped Real-time PCR Multiplex Kits

Syndromically grouped real-time PCR multiplex kits serve an important clinical need. With these multiplex kits, the physician can order a test from the lab covering probable pathogenic causes—virus, bacteria, fungi or parasite—at the same time, in one run. This can save time, resources, reagents, and money while providing a fast clinical diagnosis.

From singleplex to multiplex syndromic PCR tests, Siemens Healthineers has a solution for your molecular laboratory.
