A Urinalysis System So Advanced It Lets You Do Less and See More
Atellica 1500 Automated Urinalysis System
Atellica 1500 Automated Urinalysis System

Integrating the Power of Digital Imaging for Accurate, Reliable Urinalysis Testing

Automated urine chemistry and sediment testing in one streamlined unit

The Atellica™ 1500 Automated Urinalysis System* combines the trusted CLINITEK Novus® Automated Urine Chemistry Analyzer and the new Atellica™ UAS 800 Urine Sediment Analyzer in one completely automated unit. It’s a new, streamlined system that lets you keep up and stay ahead—no matter how busy your urinalysis workload becomes.

The CLINITEK Novus analyzer combines the urine strip technology you have grown to trust with a cutting-edge digital camera to take your urine chemistry testing to new levels of clinical relevance.

The new Atellica UAS 800 analyzer is a completely automated urine sediment analyzer powered by advanced high-resolution digital imaging that closely replicates high-power field-like microscopy—designed to minimize the need for manual microscopy.

Helps to reduce everything but quality

The Atellica 1500 Automated Urinalysis System lets you manage more samples with less staff in a shorter time, while never compromising on high-quality results. Siemens Healthineers unique combination of urine chemistry and sediment technologies also streamlines the detection of UTIs and early kidney disease for better clinical outcomes.

Do less and see more with a truly digital automated urinalysis system that sets the new standard for accuracy and efficiency.

The Atellica 1500 Automated Urinalysis System: Just what you’d expect from the pioneers in modern urinalysis.

Measurement Technology
- Digital camera that measures the color changes in the entire RGB color spectrum and applies color correction for improved accuracy
- Digital microscopy imaging
- Dual-focusing mechanism to generate clear images
- Real-time image capture function

From the point of care to the central lab, Siemens Healthineers has performance-driven urinalysis solutions to meet your needs. The same reagent strip technology standardizes testing at every location. Providing early detection, monitoring, and management of diseases, Siemens Healthineers offers the widest range of urinalysis products on the market.

More than 75 Years of Urinalysis Leadership and Innovation

Atellica Portfolio of Laboratory Products

Engineered by Siemens Healthineers to deliver control and simplicity so you can drive better outcomes.

Tighter control of your lab, simplified workflow, and more time to focus on driving better business and clinical outcomes—that's the promise of our Atellica™ portfolio of laboratory products.

Control.  
Simplicity.  
Better Outcomes.
