At Siemens Healthineers, our purpose is to enable healthcare providers to increase value by empowering them on their journey towards expanding precision medicine, transforming care delivery, and improving patient experience, all enabled by digitalizing healthcare.

An estimated 5 million patients globally benefit every day from our innovative technologies and services in the areas of diagnostic and therapeutic imaging, laboratory diagnostics and molecular medicine, as well as digital health and enterprise services. We are a leading medical technology company with over 170 years of experience and 18,000 patents globally. With more than 48,000 dedicated colleagues in 75 countries, we will continue to innovate and shape the future of healthcare.

Atellica Sample Handler

Technical Specifications

Atellica Solution

Flexible, scalable, automation-ready immunoassay and clinical chemistry analyzers engineered to deliver control and simplicity so you can drive better outcomes.

Experience the power of the Atellica® Solution, featuring patented bidirectional magnetic sample transport technology, the flexibility to create over 300 customizable configurations, and a broad assay menu with proven detection technologies.

The Atellica® Sample Handler is the sample processing component of the Atellica Solution and serves as the input/output interface regardless of the number of connected analyzers. The patented Atellica Magline® Transport connects all components in an integrated workflow. A multi-camera vision system with 360° view is designed to reduce bar-code reading errors, exception handling, and operator intervention.

Controls and calibrators are refrigerated onboard and can be shared by all connected analyzers. Automated scheduling and delivery simplify the calibration and quality control process.

Up to three Atellica Sample Handlers can be integrated with up to seven Atellica Solution immunoassay and chemistry analyzers.
Technical Specifications

**Product Specifications**

**Description**
Sample-handling component of Atellica Solution for input/output of routine samples, STAT samples, calibrators, and QC. Connects to the Atellica Solution immunoassay and clinical chemistry analyzers with the Atellica Magline Transport.

**Configurations**
Up to three Atellica Sample Handlers per configuration, supporting up to seven analyzers; connects to Aplio® Automation via Atellica® Sample Handler Connect.

**Field-upgradable**
Yes—additional Atellica Sample Handlers can be added to an existing configuration.

**Sample Handling**

**Sample Throughput**
Up to 500 tubes per hour.

**Sample Capacity**
Up to 440 samples using 15-position racks and/or 55-position racks.

**Primary-tube Sampling**
Yes, either direct or via an adapter for supported container types.

**Supported Tubes**
>30 sample container types, including tube-top cups and micro-collection devices (list of validated containers available upon request).

**Post-analytical Sorting**
220 user-defined output positions.

**Identification of Non-supported Tubes**
Validated containers are automatically processed based on their characteristics. When nonvalidated containers are identified, the operator is alerted to remove them, and the sample will not be processed.

**Sample Throughput**
Up to 500 tubes per hour.

**Sample Capacity**
Up to 440 samples using 15-position racks and/or 55-position racks.

**Primary-tube Sampling**
Yes, either direct or via an adapter for supported container types.

**Supported Tubes**
>30 sample container types, including tube-top cups and micro-collection devices (list of validated containers available upon request).

**Post-analytical Sorting**
220 user-defined output positions.

**Identification of Non-supported Tubes**
Validated containers are automatically processed based on their characteristics. When nonvalidated containers are identified, the operator is alerted to remove them, and the sample will not be processed.

**STAT Management**

**Loading**
15-position STAT racks loaded in any position in the Atellica Sample Handler.

**Prioritization**
STAT racks are recognized upon closing the drawer. STAT samples are immediately prioritized and supersede routine sample processing.

**Calibration/QC Storage**
60 positions.

**Cat/QC Temperature**
Refrigerated, 2–8 °C in a covered, enclosed environment.

**Magnetics/Running Transport**

**Individual Sample Management**
Yes.

**Sampling**
Direct tube aspiration.

**Turns**
90-degree turns: up to two per system.

**Technology**
Electromagnetic.

**Sample Tracking**
Continuous chain of custody.

**Data/Backup/Data Management**

**Monitor**
22-inch touchscreen monitor.

**Operating System**
MICROSOFT WINDOWS EMBEDDED STANDARD.

**System Documentation**

**Data Storage**
Up to 1 million results: 500,000 active and 500,000 historical; can archive to removable media.

**Host Interface**
TCP/IP bidirectional—Ethernet.

**Host Query**
TCP/IP—ASTM, IHE LAW-certified HL7 interface; system requests work order or batch of work orders from host.

**Remote Access and Service**
Smart Remote Services via 1000BASE-T Ethernet port.

**Maintenance**

**Daily**
Automated: <5 minutes, hands-on: 0 minutes.

**Daily Atellica Magline Transport Autocheck**
Automated: <10 minutes.

**Onboard Maintenance Logs**
Schedule and monitor routine maintenance activities via software.

**General Specifications**

**Power Requirements**
Requires a 4.4 kVA (U.S.)/3.7 kVA (EU) power source; single-phase, 2-pole, 3-wire configuration; with Class III grounding. Will support incoming AC voltage from a nominal line voltage range of 200 to 240 VAC, 50/60 Hz. Main supply voltage fluctuations are not to exceed ±10 percent of the nominal voltage.

**Power Consumption**
1.9 kilowatts/hour (maximum).

**Water Requirements**
None.

**Drain Requirements**
None.

**Dimensions**
Without monitor and without Atellica Magline loop:
146.5 (h) x 98 (w) x 143.1 (d) cm; 57.7 (h) x 38.6 (w) x 56.4 (d) inches.

**Weight**
464.5 kg (1035 lb).

**Compliance**
Complies with international environmental, health, and safety standards including CE and RoHS.

**Noise Emission**
Average Sound Pressure Level: 53 dBA.

**Processing Heat Output**
3661 BTU/hour.

**Ambient Temperature**
18°–30°C (64°–86°F).

**Ambient Humidity**
20–80% noncondensing.

**Altitude**
0–2000 m (0–6562 feet).

**Floor Load-Bearing Requirement**
266 kg/m².

**Overvoltage Classification**
Category II.

**Removable Media**
USB.

**Compressed Air**
None.

**Maintenance**

**Daily**
Automated: <5 minutes, hands-on: 0 minutes.

**Daily Atellica Magline Transport Autocheck**
Automated: <10 minutes.

**Onboard Maintenance Logs**
Schedule and monitor routine maintenance activities via software.

None.

*With measurement with the Atellica Magline loop is 122.2 cm (48.1 inches).
†Includes Atellica Magline loop.

Atellica Portfolio of Laboratory Products

Engineered by Siemens Healthineers to deliver control and simplicity so you can drive better outcomes.

Tighter control of your lab, simplified workflow, and more time to focus on driving better business and clinical outcomes—that’s the promise of our Atellica® portfolio of laboratory products.
