Optimize lab workflow for efficient COVID-19 testing

Flexible options with fast, reliable and easy-to-use solutions can help you establish the most efficient workflow to accommodate your lab’s specific needs, testing volumes, and resources.

*The outcomes obtained by the Siemens Healthineers customers described here were realized in the customers’ unique settings. Since there is no typical laboratory, and many variables exist, there can be no guarantee that others will achieve the same results.

93% reduction in average turnaround time1,*

2,000+ automation projects since 1998

>50 types of instruments can be connected

85% increase in lab staff and patient satisfaction1,*

>20 years of integrating laboratory best practices

7,700+ IT systems in 80+ countries

77% reduction in turnaround time1,*

1,100+ workflow health-check consultations each year

Predict possible component failures up to 21 days in advance

140 Lean-accredited Healthcare Consulting experts
