

Delta FIT

A valuable option in your IT Care Plan – offering tailored system-upgrade training

Only in addition to
Siemens IT Care Plan

Optional for the following systems
syngo.via Workstation
syngo.via Server
syngo.via RT server
syngo.plaza

Your benefits

Optimized use of systems for advanced patient care:
Rely on training that can bridge the gap between the expertise staff acquired at first system installation and what your recently updated system can offer in additional options – while making sure new staff is also kept up to speed.

State of the art training methods, tailored to your needs:
Save time and gain the most insight into new clinical applications by relying on training units that fit your schedule and the topic at hand.

Secure your investment:
You want to make sure that staff can get the most out of your system – because you need to take advantage of the enhancements it now offers.

Keep your experts up to date and ensure optimized use of your system

Rely on the Delta FIT option in your Siemens IT Care Plan

Make application knowledge a priority: maximize the use of newest software capabilities

Healthcare providers have to face an environment with fast technology evolution and the related loss of in-depth system knowledge, paired with evolving patient populations, as well as with unplanned downtime owing to an average of 58% of a hospital's assets that are idle.¹ Therefore, it is hardly surprising that recently, major attention has been given to the topic "workforce," which not only becomes more and more crucial due to rising labor costs, but also because of expected staff shortages – especially in regards to expert staff in the medical arena.

Keeping clinical staff trained is becoming a pivotal argument in the race to retain expertise. In general, studies have shown that 31% of employees don't feel like they have been trained adequately by their employers, and one out of three also believes their current skill level negatively affects their career advancement and future on-the-job-success.

The right training for your budget, high-end systems and capable staff

To keep clinical staff deeply knowledgeable of recent update options, and to support and to maintain an engaged staff while providing the best use of their valuable time, Delta FIT training is offered in a state-of-the-art blended learning approach. Based on content and coverage, you are offered a tailored training opportunity to make the best use of time and technology. From e-Learning options to remote trainer sessions, to webinars, on-site training or even *syngo* Academy² training – the format follows the content and trainee needs.

¹ Out of Control, Little-used Clinical Assets Draining Healthcare Budgets Whitepaper 2012

² *syngo* Academies: In certain countries Siemens Healthcare offers special rooms on location, equipped to deliver classroom training for all *syngo* products.

The products/features and/or service offerings (here mentioned) are not commercially available in all countries and/or for all modalities.

If the services are not marketed in countries due to regulatory or other reasons, the service offering cannot be guaranteed.

Please contact your local Siemens organization for further details.
