ADVIA Centaur Serum HER-2/neu Assay Specifications

The Siemens Healthcare Diagnostics ADVIA Centaur® Serum HER-2/neu test is a sandwich immunoassay employing direct chemiluminescence technology using two monoclonal antibodies that are specific for unique epitopes on the extracellular domain of the HER-2/neu oncoprotein. The Serum HER-2/neu test is the only serum test available to monitor Serum HER-2/neu level changes over the course of the disease.

Outstanding Assay Performance

• Broad assay range (0.5-350 ng/mL)

• Excellent reproducibility (Total %CV Range 3.2-5.7%)

Clinical Utility

• HER-2/neu values obtained may be used in the follow-up and monitoring of patients with metastatic breast cancer whose initial Serum HER-2/neu level is greater than 15 ng/mL

• No interference from HER-2/neu-based therapy

• 95% of normal patients have Serum HER-2/neu levels below 15.2 ng/mL

• Serial changes in Serum HER-2/neu have been correlated with changes in clinical status for all patients whose pre-treatment Serum HER-2/neu values exceeded 15 ng/mL

• For each pair of serial measurements, an increase of equal or greater than 15% is considered to indicate progression (predictive value of 67%)²

• For each pair of serial measurements, a change of less than 15% increase is considered to indicate a lack of progression (predictive value 71%)²

ADVIA Centaur Immunoassay Systems—Maximizing Satisfaction

• Optimal productivity – The ADVIA Centaur® and ADVIA Centaur® XP Systems each perform up to 240 tests per hour; The ADVIA Centaur® CP System performs up to 180 tests per hour

• Comprehensive menu including Anemia, Cardiovascular, Fertility, Infectious Disease, Oncology, TDM, and Thyroid

• Complete offering of breast cancer assays – CEA, CA 15-3, BR 27.29, and Serum HER-2/neu

Answers for life.
