DCA, DCA Vantage, Point of Care Ecosystem, and all associated marks are trademarks of Siemens Healthcare Diagnostics Inc., or its affiliates. All other trademarks and brands are the property of their respective owners.

Product availability may vary from country to country and is subject to varying regulatory requirements. Please contact your local representative for availability.

The outcomes achieved by the Siemens Healthineers customers described here were achieved in each customer’s unique setting. Since there is no typical hospital, and many variables exist (e.g., hospital size, case mix, level of IT adoption), there can be no guarantee that others will achieve the same results.

The DCA Vantage® Analyzer provides lab-accurate results for monitoring glycemic control in patients with diabetes and conducting annual checks for kidney disease.

- CLIA-waived HbA1c test results in minutes with just a 1 µL whole-blood fingerstick sample
- Urinary albumin-to-creatinine ratio (ACR) for early detection of kidney disease

Increase Efficiency while Decreasing Costs

The DCA Vantage Analyzer can help you:

- Improve patient compliance by providing immediate feedback and allowing therapy adjustments during the patient visit.
- Improve and meet diabetes quality measures and leverage payer incentive programs.

Improve Clinical Outcomes

By reducing HbA1c

Availability of POC A1c testing impacts HbA1c levels in both the short term (<1.5 years) and the longer term.¹

Increase Patient Satisfaction

With actionable results in minutes

Patient satisfaction scores improve with point-of-care diabetes testing.²

Reduce Costs

By increasing practice efficiency

The DCA Vantage Analyzer can reduce the need for follow-up phone calls and letters and potentially reduce associated costs.²

In a recent study, as much as $24.64 in savings per patient was realized.
