Restarting a Patient Study
Please refer to manual for complete system capabilities

1. Open Browser and find patient’s name in the Local Database
   - **DO NOT** select patient from the Scheduler

2. Single left click on the patient’s STUDY folder
   - **DO NOT** select the patient’s name folder, this will create another study folder.

3. Select Patient Register icon from the toolbar.

4. Check patient information and add any additional information that might be needed and select Exam at bottom of registration screen.
