iPilot Live
Displays Overlay on Artis Live Monitor

Please refer to manual for complete system capability

1. Load or acquire 3D dataset.

2. Select Translucent Preset from Modality Preset icon.

3. Rotate volume to desired working position.

4. Select “C-arm to Match 3D” icon and deflect joystick to move to position.

5. Adjust Table/Zoom/SID etc. to center ROI.

6. Select iPilot Live icon.

7. Fluoro. Adjust overlay percentage using TSC joystick.

8. Any change to c-arm position, table position, and/or magnification should be updated by selecting iPilot Live icon again.
