

What's on the Horizon?

The Right Information for Your Best Health.

At **[facility name]**, we're committed to providing you with the answers you need for the best cancer care as quickly and as accurately as possible. That's why we've acquired a Siemens Biograph Horizon™ PET/CT system.

How can PET/CT technology impact your health? With this medical imaging system, we can provide your doctors with the type of high-quality imaging they need to find even the smallest cancer cells earlier and be more confident in their diagnoses. As a result, they can provide you with a more personalized—and *potentially more definitive*—treatment strategy.

So if and/or when you or someone you love needs a PET/CT exam, you can look to the Horizon.
