A RADical new way in fluoroscopy. The Luminos Agile.

See things in a whole new way. Luminos Agile is the first patient-side system with dynamic flat detector technology, height-adjustable table, and true dual use fluoroscopy & radiography capability. Perfect for pediatric and bariatric patients, and those with limited mobility, Luminos Agile is designed to accommodate your complete patient range and help you deliver a positive patient care experience.

Improved patient satisfaction

- Cater to a broader spectrum of patients more successfully
- Adjustable table from 65 to 112 cm (25-44 in.) height for easy patient transfer.
- Open design and high weight capacity up to 275 kg (606 lbs) to easily cater to a broad array of patients.

Better clinical confidence

- High-quality dynamic and static imaging with the 43 x 43 cm (17-in.x17-in.) flat detector.
- Comprehensive dose reduction applications.
- Effortless system movement with the fully motorized tower.
