AXIOM Aristos: Daily System Check

1. Click on the ambulance icon to register an emergency patient.

2. Click on Study and select the Region: Daily System Check. Click on Emergency.

3. Place the 0.6 mm Cu filter into the multileaf collimator.

4. Position tube to either Wall or Table detector and make exposure. Repeat to other detector if necessary.

5. Click on Image Processing tab and Zoom and Pan the image checking for defects.

6. Record the EXI number.

7. Close Patient.
