Virtual Touch™ Imaging Workflow (Color)

1. Optimize the 2D image: Click the Virtual Touch imaging icon.

2. Use the trackball and Next key to adjust the position and size of the ROI box (over the area of interest).

3. Double-click Update. This will display a full screen image.
4. Press Update again to display VTI with color map. Image freezes and displays Color VTI acquisition. 

   **Note:** System counts down time until transducer is cooled.

5. To exit VTI, click Virtual Touch Imaging or press 2D.
