Aristos: Re-opening a patient folder

1. When selecting a patient that has been opened and closed without images, this message will appear.

2. Left-click the patient’s name on the Scheduler.

3. Right-click the patient and select Delete from the drop-down menu.

4. Update the worklist by double-clicking Scheduler.

5. Select your patient again by double-clicking the patient name.

6. Verify correct patient and proceed with exam.
