Aristos: Syngo Learning Mode

1. Under the Scheduler select the Study Level of the exam.

2. Select Patient, Register to open the Registration Page.

3. Select the correct Study from the drop down list then select Exam.

4. Make the corresponding exposure i.e. Chest X-Ray, make one exposure at the wall bucky.

5. Close the patient and go to Options, Edit Regions/Studies...

6. In the Study tab find the study in question; verify the study description/name is exactly the same and that they match the name sent from RIS.

7. Select RIS Match, and restart the system.

8. Under the Scheduler, select the test patient via the Name Level and the correct exams should open.
