Luminos TF: Opti Touch Image Review

1. At the Opti Touch display, select the Postprocessing button. A patient folder must be open and the generator must be set for fluoro for this function to be active.

2. On the Postprocessing menu, select the “Monitor Split” button. This will display all of the images in the patient folder in a thumbnail layout on the image monitor.

3. On the Opti Touch display, select the “Monitor Split” button again. This will bring one image up full screen.

4. Use the “Image Next” or “Image Previous” button to advance to the next or previous image.

5. To exit Image Review, select the “Image Acquisition” button.
