1. Select the Preregistered Patients tab at the top of the screen.

2. Locate the patient’s name to be examined and double-click the patient’s name from the list.

3. The patient’s name will appear in the top right corner, and the Examination tab will be active on the right.

4. Select the exam you want to perform from the Settings tab, and you may begin your exam.

5. After acquiring your images, select the Documentation tab and verify the marked images to go to PACs.

6. Select the Send tab. Confirm PACs is in the target 1 position, then select DICOM send.

7. Select the Patient tab on the right to close the patient.
