Multix M : Creating an OGP

1. Select System, EMdit Organ Programs.

2. Select an OGP similar to the one you want to create, i.e., making an oblique Ankle use the lateral Ankle.

3. Select Copy, then select the OGP you want to copy, then select an empty box.

4. Say OK to the pop-up box that says “Are you sure you want to copy it here?”

5. Enter the password, “admin” Then select the Edit Para.

6. Select your copied OGP and change the name.

7. Select Next Page and make sure your Parameters are okay for the new OGP.
