Multix M: Ortho Step Set-up

1. Place Ortho Stand in front of wall stand, locking into place. Use the provided step for long legs.

2. Select correct patient and Ortho program from touch screen.

3. Position patient, being sure to set the adjustable height stop at the appropriate position.

4. Acquire first image, move the wall stand to the next position with the aid of the adjustable height stop. Select correct program and repeat as necessary.

5. Select the documentation icon.

6. Select correct destination for image transfer before ending study. Then end study to send images.
