1. Click on Patient icon.

2. Select Patient (highlight name) from RIS Study Work List, then click OK.

3. Check Patient information, click OK.

4. Select Workstation tab and Organ Program from Organ Program preview screen.

5. Wait for the Detector “Ready” message, then acquire image.

6. Acquired image appears on the Preview Screen. Perform QA functions if necessary.

7. Click OK twice when satisfied with images.

8. Click End Study on Organ Program Preview screen to send images to PACS or the Hard Copy Camera.
