1. Open up PEX Editor. Click on Siemens and enter password.

2. Click on Param. Module. You will view the Stand Position section.

3. Click the dropdown arrow by Identifier and pick a “c” number that is not being used. Type in new name.

4. Go into the room and position the tube into the newly defined position.

5. Click on Store Parameters and then Store Position.

6. Click on Exam tab and find OGP View you want to attach the Stand Position to. Double click on the name.

7. You are now on the Organ Program tab. Look at the Stand Parameters box and click the drop down by Stand Position.

8. Pick your newly created position and click on Store as New.
