ACUSON SC2000™ volume imaging ultrasound system- Modifying an eSieScan protocol

1. Highlight protocol you wish to modify.

![Highlight protocol image]

2. Choose copy.

![Copy protocol image]

3. Rename the protocol.

![Rename protocol image]
4. Add, edit, or delete steps, modes, settings, measurements, and clip capture parameters as needed.

5. Choose apply, then ok.

6. You have the ability to hide the factory default once you have modified. The protocol name would then be grayed out.
