How to Edit Header Information on Biograph® PET·CT

1. Open the syngo Patient Browser and find patient name. From the series level, click once on the PET raw data.

2. After clicking on the PET raw data, image stamps will appear at the bottom of the browser.

3. Click once on an image stamp 2001 or higher. Next open the Sinogram Editor icon at top of browser as shown.

4. The Sinogram Editor will open to the tab showing dose weight and injection information.

5. Enter corrected information as needed. Click apply and commit to database.

6. A message will be displayed to post process the data for correct SUV information.

7. Post process the data for correct SUVs.
