Biograph® mCT —
Changing the Date and Time

1. Verify that the system is in an idle state and that there are no active processes running.

2. On the syngo® Acquisition Workplace, select Options > Configuration.

3. Double-click the Date and Time icon.

4. The Date and Time properties window will be displayed.

5. On the Date and Time tab, adjust the current local time.

6. Restart the system by selecting System > End. Select Restart System. This updates the date and time on the ACS and PRS computers. All computers will synchronize with the new time information.

7. The date, time, or time zone can be changed on the syngo MI Workplace using the same method that you used on the syngo Acquisition Workplace.
