How to Fix a “Class Not registered” Error When Trying to Edit a Flexible Display

1. Press the Windows key (flag) between Ctrl and Alt on the lower left side of your keyboard. This will activate your Windows menu.

2. Use your mouse to highlight and left-click on the Run option at the bottom of the menu.

3. Type cmd in the open: selection box.

4. In the cmd.exe box, type regsvr32 mfc40.dll and press Enter. Click OK to the DllRegisteredServer in mfc40.dll succeeded message.

5. Keep the cmd.exe box open and repeat Step 4 for each .dll listed below
   • regsvr32 mfc40u.dll
   • regsvr32 mfc42.dll
   • regsvr32 mfc42u.dll

6. After you OK your last .dll succeeded message, then close out of the cmd.exe box and proceed to edit your flexible display.

7. If you continue to have problems editing your flexible display, please call Siemens UPTIME Clinical Applications Support at 1-800-888-7436.
