How to Perform a Partial Detector Setup on Biograph TruePoint Systems

1. Depending on your PETCT_QualityCheck protocol settings, you may be prompted to run the partial detector setup on the ACS.

2. To run the partial detector setup procedure: Make sure the uniform phantom is positioned in the PET FOV.

3. Press [Ctr][Ctr] until the ACS desktop is displayed.

4. Double click the Partial Setup icon.

5. Click Start to run.

6. If the setup is successful, click OK and press [Ctr][Ctr] to return to the ICS.

7. If setup is not successful, check the phantom placement and repeat. If the problem persists, call service.
