6. The MI Apps application will now launch on your client. From this screen, you will be able to access patient information that has been transferred from the acquisition computer.
7. **Reviewing Patient Images**
In the upper left hand corner of the MI Applications screen press the **Refresh** button.

8. Ensure that you are on the correct viewing level for the data you want to review: Patient, Study or Series.

9. Ensure that the **Study Date** is set to the desired setting.

10. Single click on the desired patient, study or series in the Patient Browser.
11. Select the desired workflow category.

12. Double click the desired workflow template.

13. You now should be able to review the data. If you have any issues/questions, please call the Uptime Service Center at 1-800-888-7436.
