ACUSON S Family™ Ultrasound System-
Exporting an eSieScan™ Protocol

1. Press *System Config* (F4) to open the system configuration menu.

2. Choose *eSieScan Protocols*.

3. Insert USB Device into the system Select *Export*.
4. The Import/Export Box will appear with a list of all Protocols both on the system and on the USB Device.

5. Choose **Select All, Select None**, or Manually check or uncheck Boxes.

6. Once the desired Protocols to Export are checked, select **Export**.
