ACUSON S Family™ Ultrasound System-
Importing an eSieScan™ Protocol

1. Press **System Config** (F4) to open the system configuration menu.

2. Choose **eSieScan Protocols**.

3. Insert USB Device into the system Select **Import**.
4. The Import/Export Box will appear with a list of all Protocols both on the system and on the USB Device.

5. Choose **Select All, Select None**, or Manually check or uncheck Boxes.

6. Once the desired Protocols to Export are checked, select **Import**.
7. Once Imported and complete, the Import/Export Box will disappear.
