1. From the main toolbar, select Options > Configuration. Double click the Viewing icon.

2. Click on the Evaluation General tab of the Viewing Configuration window.

3. Click in the Default window field and note the existing text in that box is now highlighted in blue. Use the backspace key to remove the text. DO NOT CLICK THE DELETE BUTTON.

4. Enter the name of a customized window you would like to create. For Window 1 settings ONLY, enter new values each for Width and Center.

5. Click Apply. Confirm the customized organ window now appears in the list of selectable settings in the Default window drop down list.

**Custom organ windows can be assigned to any recon job within any scan protocol.**
